Digital Frothing & Beverage Thermometer

D8026

Instruction Manual

This handy thermometer lets you create perfect froth using a jug and coffee machine/steamer.

1. Remove rubber stopper from end of stainless steel probe.
2. Press \downarrow /SET for 1 second to turn on.
3. Press \downarrow /SET again to select preset temperature (60°C, 65°C, 70°C) or set your own temperature in the User Set mode. Use + or - button to adjust temperature. Press \downarrow /SET to confirm setting.
4. Insert thermometer approximately 5cm into milk and steam to heat. Fasten to side of jug with clip.
5. Buzzer will sound for 60 seconds when desired temperature is reached. Press any key to stop buzzer.
6. Press \downarrow /SET for 2 seconds to turn off. Will also turn off automatically after 10 minutes.

Frothing tips: Frothing temperature should be between 65°C and 70°C. For best results use non-fat milk. After frothing milk allow it to sit for a minute to thicken before drinking.

Clean with a warm, damp cloth. Do not immerse electronic head in liquids. Temperature range 0°C – 200°C.

WARNING - KEEP BATTERIES OUT OF THE REACH OF CHILDREN

- This product contains a button battery.
- Swallowing may lead to serious injury in as little as 2 hours or death, due to chemical burns and potential perforation of the oesophagus.
- Tell others about the risk associated with button batteries and how to keep their children safe.
